

A reference — SYNTHETIC — DEMONSTRATION ONLY

SYNTHETIC — DEMONSTRATION ONLY

Accepted semantic revision: 0

Scope and responsibilities

- [vms] VMS: video management; existing; zone infrastructure; quantity undecided. Evidence: claim-vms.
- [operator] Operator workstation: operator; existing; zone client; quantity 1. Evidence: claim-operator.
- [configuration] Configuration workstation: configuration; existing; zone client; quantity 1. Evidence: claim-configuration.
- [management] VAP management: management integration; new; zone z1; quantity undecided. Evidence: claim-management.
- [analytics] VAP analytics: analytics; new; zone z2; quantity undecided. Evidence: claim-analytics.
- [c2] C2: external command system; existing; zone unspecified; quantity undecided. Evidence: claim-c2.
- [audit] Audit destination: audit; proposed; zone z1; quantity undecided. Evidence: claim-audit.
- [enforcement] Management enforcement: firewall; proposed; zone z1; quantity undecided. Evidence: claim-enforcement.

Interfaces and session initiation

- [video] VMS → VAP analytics: video; flow source_to_target; initiator VAP analytics; protocol RTSP; port undecided; enforcement unspecified.
- [events] VAP management → C2: events; flow source_to_target; initiator VAP management; protocol HTTPS; port undecided; enforcement unspecified.
- [administration] Configuration workstation → VAP management: management; flow bidirectional; initiator Configuration workstation; protocol HTTPS; port undecided; enforcement enforcement.
- [integration] VAP management → VAP analytics: integration; flow bidirectional; initiator VAP management; protocol HTTPS; port undecided; enforcement unspecified.

Constraints and open decisions

- capacity_streams: 100
- equipment_sizing: undecided
- no_internet: True
- resilience_required: False
- availability_strategy: single_instance
