

Baseline VAP integration statement of work

SYNTHETIC — DEMONSTRATION ONLY

Version 1.0 | Fixture date 21 September 2026

Purpose and scope

Integrate existing video management with a new video analytics platform. Keep application responsibilities separate from deployment sizing. Existing C2 is outside the VAP system boundary and its internal zoning is unspecified.

Systems and placement

ID	Source requirement
vms-system	System vms-system: name="VMS"; scope="internal"
client-system	System client-system: name="Client"; scope="internal"
vap-system	System vap-system: name="VAP"; scope="internal"
c2-system	System c2-system: name="C2"; scope="external"
infrastructure	Zone infrastructure: name="Infrastructure"
client	Zone client: name="Client"
z1	Zone z1: name="Z1"
z2	Zone z2: name="Z2"
vms	Component vms: name="VMS"; role="video management"; system_id="vms-system"; zone_id="infrastructure"; status="existing"; asset_id="application"
operator	Component operator: name="Operator workstation"; role="operator"; system_id="client-system"; zone_id="client"; status="existing"; asset_id="workstation"; quantity=1
configuration	Component configuration: name="Configuration workstation"; role="configuration"; system_id="client-system"; zone_id="client"; status="existing"; asset_id="workstation"; quantity=1
management	Component management: name="VAP management"; role="management integration"; system_id="vap-system"; zone_id="z1"; status="new"; asset_id="api-service"; audit_destination="audit"
analytics	Component analytics: name="VAP analytics"; role="analytics"; system_id="vap-system"; zone_id="z2"; status="new"; asset_id="analytics-engine"
c2	Component c2: name="C2"; role="external command system"; system_id="c2-system"; zone_id=null; status="existing"; asset_id="external-system"; scope="external"
audit	Component audit: name="Audit destination"; role="audit"; system_id="vap-system"; zone_id="z1"; status="proposed"; asset_id="audit-service"
enforcement	Component enforcement: name="Management enforcement"; role="firewall"; system_id="vap-system"; zone_id="z1"; status="proposed"; asset_id="firewall"

Review guidance: null means not specified. Do not invent addresses, ports, firewalls or server counts. C2 zoning remains unspecified outside VAP.

Interfaces and decisions

ID	Source requirement
video	Interface video: source="vms"; target="analytics"; purpose="video"; data_direction="source_to_target"; initiator="analytics"; protocol="RTSP"; port=null
events	Interface events: source="management"; target="c2"; purpose="events"; data_direction="source_to_target"; initiator="management"; protocol="HTTPS"; delivery="push"
administration	Interface administration: source="configuration"; target="management"; purpose="management"; data_direction="bidirectional"; initiator="configuration"; protocol="HTTPS"; enforcement=["enforcement"]
integration	Interface integration: source="management"; target="analytics"; purpose="integration"; data_direction="bidirectional"; initiator="management"; protocol="HTTPS"
capacity	Constraint capacity: key="capacity_streams"; value=100
sizing	Constraint sizing: key="equipment_sizing"; value="undecided"
offline	Constraint offline: key="no_internet"; value=true
resilience	Constraint resilience: key="resilience_required"; value=false
availability	Constraint availability: key="availability_strategy"; value="single_instance"

Review guidance: null means not specified. Do not invent addresses, ports, firewalls or server counts. C2 zoning remains unspecified outside VAP.
